SUMMARY

AI Engineer who shipped a production RAG system validated at 89% answer accuracy by 10 IIT faculty reviewers. Build end-to-end LLM pipelines — semantic retrieval (FAISS), multi-agent workflows, and fine-tuned transformers — deployed as scalable FastAPI services. Focused on retrieval relevance, latency, and measurable output quality.

WORK EXPERIENCE

- **ARTIFICIAL INTELLIGENCE & MACHINE LEARNING ENGINEER** February 2026 - Present
SENEXXEL CORPORATION INDIA [EVONSYS GROUP] On-Site
 - Engaged on the RIZEE RAG platform as a Stag Innovations contractor (Nov 2025 – Jan 2026); converted to direct hire in Feb 2026.
 - Achieved **89% answer accuracy and groundedness** (validated by **10 IIT faculty reviewers**) by building a production **Retrieval-Augmented Generation (RAG)** pipeline for the RIZEE (MyLearningPlus) platform that ingested **700+ subject materials** into metadata-tagged chunks, embedded with SentenceTransformers and indexed in per-group FAISS for top-4 semantic retrieval.
 - Cut **time-to-first-token to under 4 seconds** by streaming Qwen3 (Ollama) responses **token-by-token** and suppressing chain-of-thought (<think>) leakage for clean output.
 - Improved answer relevance across diverse student intents by engineering **query routing and query-type detection** that switch between question-bank and study-material indexes and between short and detailed (8-section) answer formats.
 - Built **multi-agent AI workflows** — a concept-aware **MCQ generation agent** with JEE Mains/Advanced difficulty calibration and a Qwen3-VL **image-to-solution agent**, chaining vision OCR to an LLM solver.
 - Automated end-to-end exam-paper ingestion by engineering a **Mathpix OCR → LaTeX→MathML → structured-JSON pipeline** feeding a classifier stack (chapter, multi-label topic, concept, difficulty, time-to-solve) on LogisticRegression / LinearSVC and a BERT multitask head, auto-inserting enriched questions via REST and MySQL.
 - Deployed all inference services as **FastAPI microservices** with asyncio concurrency guards on GPU-bound LLM calls, addressing chunking strategy, retrieval relevance, latency, and multi-response consistency.
- **JUNIOR ARTIFICIAL INTELLIGENCE & MACHINE LEARNING ENGINEER** January 2025 - January 2026
STAG INNOVATIONS PVT. LTD. On-Site
 - Worked on client-based AI projects, contributing to the development of enterprise AI solutions.
 - Reduced recruiter screening time by **70%** and reached **85% job-match accuracy** by building an AI hiring-intelligence platform with OCR and transformer-based NLP pipelines.
 - Cut manual email-processing effort by **60%** by fine-tuning **RoBERTa** classifiers to automate recruiter-email categorization and prioritization.
 - Delivered production-ready ML by designing end-to-end pipelines spanning data preprocessing, model training, evaluation, and API deployment for BERT / RoBERTa classification and information-extraction tasks.
- **ARTIFICIAL INTELLIGENCE & MACHINE LEARNING INTERN** July 2024 - December 2024
STAG INNOVATIONS PVT. LTD. Hybrid
 - Built an ML-based **Network Intrusion Detection System (NIDS)** using supervised and unsupervised learning to detect port scans, DDoS patterns, and anomalous network behavior in real time.
 - Designed **feature extraction and anomaly detection pipelines** to identify malware activity and brute-force attempts, improving early threat detection accuracy.

SKILLS

- **AI / Machine Learning:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Multi-Agent Workflows, Explainable AI (SHAP), Model Evaluation, Data Preprocessing
- **NLP & GenAI:** BERT, RoBERTa, GPT, Qwen, Hugging Face Transformers, FAISS, ChromaDB, Vector Databases, LangChain, Prompt Engineering, LLM Fine-Tuning, Text Classification, Sentiment Analysis
- **Programming & ML Frameworks:** Python, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, SQL, Bash
- **Model Serving & Deployment:** FastAPI, Docker, REST APIs, Ollama, Model Inference Pipelines
- **Tools:** Git, Linux, Mathpix, Anthropic (Claude), Cursor, Antigravity

PROJECTS

- **DocIntel Agent — Agentic RAG Research Assistant** Personal Project
 - Designed a bounded **agentic loop**: a planner LLM produces a JSON retrieval plan, pre-fetches evidence, triggers live web ingestion when evidence is weak, and synthesizes a **confidence-graded answer** with per-chunk HIGH / MEDIUM / LOW reliability tags.
 - Implemented **multi-source ingestion** (Wikipedia, arXiv, GitHub, StackOverflow) into a cosine-space ChromaDB vector store with normalized embeddings for consistent similarity scoring.
 - **Tech Stack**: FastAPI, LangChain, ChromaDB, Ollama (Qwen3), SentenceTransformers.
- **JobGenie – AI-Powered Job Portal** January 2025 - October 2025
 - Developed an **AI-based job recommendation system** using **text embeddings and ranking models** to match candidates with relevant roles.
 - Applied **NLP-driven assessment and scoring** techniques to support interview simulation and candidate evaluation workflows.
 - Impact: Improved recruiter efficiency by **70%** through automated job-matching and AI-assisted screening.
 - **Tech Stack**: Python, BERT, GNN, NLP, AWS
- **Email Extraction & Classification System** January 2025 - October 2025
 - Built an **OCR + NLP pipeline** to extract and classify unstructured recruiter emails into structured, searchable formats.
 - Fine-tuned **RoBERTa-based classifiers** to automate email categorization and prioritization.
 - Impact: Reduced manual email-sorting effort by 60%.
 - **Tech Stack**: Python, OCR (Tesseract), RoBERTa, NLP

EDUCATION

- **Bachelor of Technology in Computer Science and Engineering (AI-ML)** 2021 - 2025
Sir Padampat Singhanian University (Udaipur, Rajasthan)
- **Pre-University Education (MPC)** 2019 - 2021
SPR Junior College (Warangal, Telangana)

ACHIEVEMENTS

- **Captain & Champion, University Intercollege Volleyball League (2023, 2024)** – led the team to back-to-back titles and headed the Cluster Club, organizing intercollegiate events across multiple colleges.
